

JORDAN PATEL

Email: jordan.patel@example.com | GitHub: github.com/jordanpatel-dev | Location: Austin, TX

PROFESSIONAL SUMMARY

High-impact Backend Software Engineer with 4+ years of experience building resilient microservices, high-throughput REST APIs, and event-driven architectures. Specialist in Python, FastAPI, Django, PostgreSQL, and Redis caching.

CORE TECHNICAL SKILLS

- ? Languages & Frameworks: Python, SQL, JavaScript, FastAPI, Django, Flask, Node.js
- ? Databases & Caching: PostgreSQL, Redis, MySQL, MongoDB
- ? Cloud & DevOps: Docker, GitHub Actions, AWS, Linux, CI/CD, Terraform
- ? Engineering Methodologies: PyTest, TDD, Unit Testing, System Design, RESTful Architecture, Agile Scrum

WORK EXPERIENCE

Backend Software Engineer | CloudVantage Labs (2021 - Present)

- ? Developed core asynchronous REST APIs using FastAPI and Python handling 10,000+ requests/minute.
- ? Optimized PostgreSQL query performance, reducing database latency by 42% through query indexing and Redis caching.
- ? Automated continuous integration and deployment CI/CD workflows using Docker and GitHub Actions.
- ? Implemented unit testing and integration test suites using PyTest, achieving 92% code coverage.

Software Developer | NextGen Soft (2019 - 2021)

- ? Built Django web applications and integrated REST APIs with relational database backends.
- ? Designed database schemas and managed migrations in PostgreSQL.
- ? Participated in agile sprints, daily standups, and bi-weekly code reviews.

EDUCATION

? Bachelor of Engineering in Computer Science - University of Texas at Austin (2019)
