

SENIOR BACKEND SOFTWARE ENGINEER

Company: NovaCloud Systems | Location: Austin, TX / Remote

ABOUT THE POSITION

We are looking for a Senior Backend Software Engineer to design, scale, and maintain our enterprise microservices platform.

REQUIREMENTS & QUALIFICATIONS

- ? 4+ years of professional backend engineering experience with Python.
- ? Strong experience with FastAPI or Django building asynchronous RESTful APIs.
- ? Deep understanding of PostgreSQL database design, indexing, and query optimization.
- ? Hands-on experience with in-memory caching systems such as Redis.
- ? Proficiency with Docker containerization and CI/CD automation using GitHub Actions.
- ? Experience deploying services on AWS cloud infrastructure.
- ? Commitment to unit testing, test-driven development (TDD), and PyTest.
- ? Bachelor's degree in Computer Science or equivalent practical experience.
